In order to solve the most pressing problems of mankind in the next 1000 years and to fulfill the positive prophecies of religious prophets throughout the ages, now that advancing technology has provided the means for mass production and automatic industry, the further evolution of mankind requires a unique and non-violent revolutionary means of equitably distributing the amazing abundance that our technology can now produce.

You might ask: "If this new economic system is so great, why is it that we haven't heard about it before?" You've all heard the old saying that "Necessity is the mother of invention." Well, the needs of mankind, beginning now in the 3rd Millennium at the beginning of THE INTERPLANETARY AGE, require an economic system that will provide the economic security and abundance required to meet the needs of everyone in the wonderful more idealistic world of tomorrow. Such a system is known by the benevolent E.T.'s as part of "God's Divine Plan," and they tell us that it is now time for mankind to evolve to the next step in this plan!

Actually, this unique economic system is not new at all, since it has been used on other advanced planets of the Universal Confederation of Planets for eons of time. It's basic concepts were originated on Earth in 1947 as "Prior Choice Economics" by Addison Brown when he was a student of nuclear physics at the University of Louisville in Louisville, Kentucky.

In the early 1950's, Mr. Brown became a religious prophet and used the name John Believer to articulate his philosophy. His numerous writings on "Believerism" covered almost every aspect of human existence, and he gave mankind two new commandments: LIVE IN BALANCE and NO MORE DESTRUCTION, which, if adhered to, would produce the long prophesied "Heaven on Earth".

Then, in the early 1960's, we were informed by the Korendians (advanced benevolent E.T.'s of the Universal Alliance of Planets), through the writings of space contactee Bob Renaud in our magazine "Flying Saucers International," that all the 740,000 member planets of the Alliance had for hundreds of years used the same system proposed in 1947 by Mr. Brown. But the Korendians called it "Universal Economics," because it had been used for eons of time so universally throughout the galaxy. Also, "Universal Economics" ("UnEc" for short), is the non-money economic system referred to by the E.T. contacts of most of the pioneer space contactees of the early 1950's and 1960's.

Also, Space Commander Ashtar, head of the Ashtar Command, refers to the Universal Economic System and the United World government as "The Keys to the Kingdom."

(There's much more to come about all this soon. ----- Gabriel)
